TO John Czapor

DATE February 11, 1982

FROM: Amelia Janisz

SUBJECT Borne Chemical Co.
TDD #02-8106-03

John,

Here are copies of the Caleb Brett and Case Consulting Laboratories, Inc. data. I have included a copy of Borne's own estimate sheet of the volumes remaining in some of the tanks, and a summary figure of all the pertinent data.

I should point that temperatures of at least 150°F will be reached in the tanks on a hot summer day."

Anything else you need, please call.

Amelia
